

Deepen Activities

- 1 a) Max is thinking of a number less than 1,000. When he adds 67 to his number, the answer is 745.

What is his number?

- b) Make up three more problems like this for a partner to solve.

How can I use the information I do know to find the secret number?

- 2 a) Bella is thinking of a number less than 1,000. When she subtracts 83 from her number, the answer is 644.

What is her number?

- b) Make up three more problems like this for a partner to solve.

- 3 a) Fill in the missing digits in this addition to make a correct calculation.

$$3\boxed{}6 + 1\boxed{} = \boxed{}5\boxed{}$$

H	T	O
	5	

I will start with the 1s and try out different digits.

- b) What if it was a subtraction instead of an addition?
